Practice Adding Three Digit Numbers on an Open Number Line

Name: _____   Date: _____

1. Look at the problem and decide which addition strategy you want to use.
2. Draw a point on the number line and write the larger addend beneath it.
3. Add the hundreds, tens and ones as seen in the example, noting the new sum after every jump.
4. Write the sum in the last column.

Addends	Use the open number line to find the sum	Sum
45 + 34		79
22 + 39		
134 + 422		
368 + 110		
654 + 351		
945 + 242		

BONUS: *Write your own addends and have a classmate find the sum. Check their answers to see if they got them right.*
